

1492 Wiring Systems Modules

[1492-AIFM16-F-5](#)

1492-AIFM16-F-5

*Representative Rendering, Not The Actual Product*

Fusible 16 Channel Analog IFM, 24V Blown Fuse Indicators, 5 Terminals per Input , , , Analog Interface Module

Product Details

| I/O MODULE DATA          |                                                                                                 |
|--------------------------|-------------------------------------------------------------------------------------------------|
| Please Note:             | You must select an I/O Module in order to choose a Pre-Wired Cable with Connectors on Both Ends |
| WIRING SYSTEMS DATA      |                                                                                                 |
| Product Type             | Analog Module with Fixed Terminal Block                                                         |
| Cable Connector Pin Type | D-Shell Cable                                                                                   |
| Interface Module Style   | Fusible                                                                                         |
| Analog I/O Channels      | Sixteen Channels, Input                                                                         |
| Terminal Features        | 24V Blown Fuse Indicators                                                                       |
| LED or Fuse Voltage      | None                                                                                            |
| Field Side Terminals     | Five per Input Connection                                                                       |
