Technical data

Notes

General	<p>When mounted in rows without convection cooling, the nominal device current should only be led to a maximum of 80% due to the thermal effect during continuous operation (100% operating factor).</p> <p>Special precautionary measures must be taken in systems or machines, to prevent components from restarting (e.g., use of a safety PLC).</p> <p>Parallel connection of multiple circuit breakers is not permitted.</p>
