## Rope Pull Emergency Stop

### Data Sheet

LineStrong is a rope pull emergency stop switch, used for easy reach of the emergency stop function along machines and sections of conveyors.

A rope pull emergency stop switch allows to initiate the emergency stop command from any point along the installed wire length by pulling the wire. It replaces a series of emergency stop buttons and is easier to install.

#### Easy to Install

##### Quick Installation

A pull wire emergency stop switch is easier to install than a system of several emergency stop buttons along a carriage path.

##### Variety of accessories

Quick link rope system makes installation of rope easy. Different pulleys allow for easier installation

#### Continuous operation

##### Reliable in extreme conditions

Robust construction makes Linestrong ideal for use in demanding environments.

##### LED diagnostics

Integrated LED diagnostics ensures status can be seen easily from a distance.

#### Safety and Protection

##### Easily accessible

Easy reach of the emergency stop function along machines, conveyors and processes.

##### High level of safety

The positive forced disconnect contacts provide a high level of safety and are double switching, i.e. triggers emergency stop in both directions of the wire.
