

■ Input Noise Filters for EMC Directives (3G3RV-PFI□, by Schaffner)

When conformance to the EMC Directives in the EC Directives is required, always use one of these Filters. The Filter is connected between the Inverter's power supply input terminals (R/L1, S/L2, T/L3) and the power supply.

There are holes for mounting the Noise Filters to Inverters on the top of the Noise Filters. Use these holes to secure the Noise Filters to the Inverters.

Models and Application

The standard models of Input Noise Filters for EMC Directives are listed in the following table.
