3SB3: Is SIGNUM 3SB3 flame-retardant and self-extinguishing in the event of a fire?

QUESTION:
Is SIGNUM 3SB3 flame-retardant and self-extinguishing in the event of a fire?

ANSWER:
For the safety and protection of the user all SIGNUM 3SB3 components comply with a number of national and international standards such as e.g. VDE, IEC, UL and CSA. This includes standards for the safety of personnel.
In accordance to these standards plastic materials used are classified as self-extinguishing after the fire source is removed.
