## Pushhutton Units and Indicator Lights

## Class 50 Standard Duty Pushhutiton Stations

## General

## Features

- Snap In Legend Inserts
- Flush and Surface Mounted Types
- Convertible Selector
- Double Break Contacts
- Dual Voltage Pilot Light with Snap In Lens
- Conversion Kits
- UL Listed File \#E22655
- CSA Certified File \#LR6535

## Application

Standard duty control stations are used with magnetic controllers to control the starting, stopping, reversing or speed of applicable motors.
Stations are assembled of one, two or three push button, selector switch or pilot light units in a variety of combinations to provide compact control units for remote control of magnetic starters and contactors.
Station enclosures are available in Type 1 surface mounted, 1B flush plate mounted and 4 watertight.

## Features

Type 1 surface mounted bases are constructed of 14 gauge sheet steel, primed and finished in baked gray enamel. The base is predrilled to receive a variety of contact blocks, pilot lights and accessory devices. Covers are of 20 gauge sheet steel, wraparound construction, primed and finished in baked gray enamel. Siemens Type 4 watertight heavy duty push button stations are supplied with a provision to padlock the stop button in the depressed position.
Enclosures are predrilled and tapped for $3 / 4$ " conduit.
Contact blocks have double break, fine silver contacts with a NEMA B600 rating. Type 4 stations have a NEMA A600 rating.
The pilot light assembly is dual voltage with clearly marked pressure type terminals for 120 volt or 240 volt connection.
The lens of the pilot light snaps into the cover and is available in both red and green.
Push buttons are equipped with an operator into which a selected legend insert is snapped. Legend inserts are molded thermoplastic and come in a wide variety of legends and colors.
The selector switch operator can be instantly set for two or three positions at any time.

## Mushroom Head

50ZMH mounts on any standard push button operator. The Mushroom Head is red molded thermoplastic, $11 / 2^{\prime \prime}$ in diameter, and provides a large operator for emergency stop or similar applications.

## Mechanical Interlock

50ZAM is a base mounted zinc plate, dichromate dipped, steel assembly. When mounted in conjunction with Duplex Contact Block 50ZAC3 (one NO and one NO) the interlock prevents one contact from being closed while the other contact is closed.

## Padlock Attachment Kit

50ZAL can be mounted to any Type 1 surface mounted station by the lower screw which fastens the cover to the station base. Made of heavy steel, chrome plated, the attachment provides for the padlocking of a push button in the depressed position or a selector switch in any position. When used with a push button operator, raised Legend Insert D53493003 (Red Stop) must be used.

Pendant Bracket
Adapts standard Type 1 surface mounted stations for suspension from a cable or chain. Bracket 50ZAP2 is used for one and two unit stations, 50ZAP3 for three unit stations.

2 Push Buttons Surface Mounting, NEMA 1

1 Push Button Surface Mounting

1 Selector Switch Flush Mounting

## Electrical Ratings

NEMA AC Ratings $50 / 60 \mathrm{~Hz}$
Nema B600 5 Continuous Amps

| Volts | Make | Break |
| :--- | :---: | :---: |
| 120 | 30 | 3 |
| 240 | 15 | 1.5 |
| 480 | 7.5 | 0.75 |
| 600 | 6 | 0.6 |
| VA | 3600 | 360 |

## Ordering Information

## Pushbutton Units and Indicator Lights

## 30 mm Heavy Duty, Watertight/Oiltight, Class 52

## Features

- Octagonal Mounting Nuts
- Meets Type 1, 3, 3R, 4, 4X, 12, 13 and Automotive Standards
- Heavy Duty Rated NEMA A600/P600 Contacts
- $\Theta$ Positively Driven Contacts
- Positive Indexing Selectors
- Bifurcated Movable Contacts
- Attractive Chrome Plating
- Boots Not Required for Type 4
- UL Listed File \# E22655
- CSA Certified File \# LR6535
- Touchsafe Terminals

## Application

Oil tight pilot controls and accessories are designed to provide long, trouble free service in the most demanding industrial applications. These controls are oil and dust tight and meet Type 3, 4, 4X, 12 and 13 specifications.

## Rugged

Industrial control operators are durable one piece castings. Heavy duty plastic buttons resist oils and corrosion. Silver contacts carry heavy duty ratings.

## Flexible

Accessories modify standard push buttons, selector switches and pilot lights. Building block construction of contact blocks makes possible many circuitry combinations.

## Industrial Appearance

Pilot controls add luster to panels. Chrome plating covers exposed metal parts.

## Push Button Operators

The Operator Base consists of a durable, one piece casting equipped with a heavy duty actuator with a stainless steel spring, a neoprene actuator sealing ring to prevent oil and dust from penetrating to the contact blocks, a neoprene gasket to seal operator mounting hole and a chrome plated lock nut.

## Mushroom Head Push Button Operators

The Mushroom Head base construction is identical to the push button base. The actuator is molded of high impact material for either a 158 inch or $21 / 2$ inch diameter molded head.

## Pushbutiton Complete Units

E-STOP Mushroom Head Operators according to EN 60947-5-5 Cat. No. 52BP, 52BR, 52PP, and 52PR, 2 Position, Twist-ToRelease \& 2 Position, Push Pull Maintained operators provided with red operating heads and 52BJK contact blocks meet the requirements of EN 60947-5-5 for Electrical Emergency Stop Device With Mechanical Latching Function (e-stop).

## Contact Blocks

Contact Blocks have double break bifurcated silver contacts, with gold flashing as standard, which improves contact reliability. Contact blocks are heavy duty rated NEMA A600 and suitable for applications down to $5 \mathrm{~V} / 1 \mathrm{MA}$ solid state outputs. 52BJK offers $\Theta$ Positive Opening Contacts according to IEC 60947-5-1, Appendix K. Molded bodies and pushers resist arcing and tracking. All units have stainless steel springs that resist corrosion and provide strong contact pressure. Captive mounting screws speed panel assembly.

## Push Pull Operators

Push Pull Operators combine two or three functions in one unit. The maintained operator has two positions, typically pull to start, push to stop. The momentary operator with three positions provides spring return from both pull and push positions. In addition, a three position push maintained, pull momentary operator is available. The actuator come is $13 / 4$ inch or $21 / 2$ inch diameter and is available in an illuminated version.

## 2 Button Maintained Operator

Maintained Push Buttons consist of two push buttons and a latching assembly. When actuated the button remains depressed and is freed only by the release operator to which it is linked. The button assembly adjusts for mounting from a $113 / 16$ inch to a $25 / 8$ inch center.

## Transformer Type Pilot Lights

Transformer Type Pilot Lights are available with a 120, 240, 480 or 600 Volt primary (50/60 Hertz) and a separate secondary winding which supplies reduced voltage to a miniature bayonet base 6 Volt lamp. These units are suitable for applications where vibration is present and long bulb life is desirable.

## Full Voltage Type Pilot Lights

Full Voltage Pilot Lights are available for 6,12, 24 and 120 Volt AC and DC applications.

## Electrical Ratings

NEMA AC Ratings 50/60Hz NEMA A600 10 Continuous Amps

| Volts | Make | Break |
| :--- | :---: | :---: |
| 120 | 60 | 6 |
| 240 | 30 | 3 |
| 480 | 15 | 1.5 |
| 600 | 12 | 1.2 |
| VA | 7200 | 720 |

## Ordering Information

- Accessories see page 17-268-17-271.
- Selector Position and Contact Operation page 17-266.
- Legend Plates see page 17-278.
- Enclosures see page 17-277.

## Resistor Type Pilot Lights

Resistor Type Pilot Lights are available for 240 Volt AC and DC applications. The 240 Volt pilot light is supplied with a 120 Volt lamp and a voltage dropping resistor.

## LED Type Pilot Lights

LED's (light emitting diodes) can be used in pilot lights instead of incandescent bulbs because of their long life (up to 10 years), resistance to vibration and ambient sensitivity. Clusted LED options are available for standard pilot lights only. Cluster LED options are not available on Push to test Pilot Lights, Illuminated Pushbuttons, Push-pull, or Twist-to-Release Operators.

## Integrated LED Module Type Pilot Lights

The integrated LED module is available for 24,120 , and 240 V . LED modules are vibration resistant and have a long life (up to 10 years). The integrated LED module is available for 24,120 , and 240 V . LED modules are vibration resistant and have a long life (up to 10 yrs.).

## Selector Operators

Selector Operators have positive action indexing. Operators are available with either a short or long lever. The molded black lever is designed to accept a color insert. A white insert is provided as standard. Each operator is equipped with a cam to actuate plungers of contact blocks assembled behind the operator. Two, three and four position operators are available with seven different cams.
Lever color inserts are available in 8 colors.

## Pushbutton Units and Indicator Lights

30 mm Heavy Duty, Watertight/Oiltight, Class 52
Selection and ordering data

(1) For other contact block assemblies replace the 8th digit catalog number as follows:
$\mathrm{C}=3 \mathrm{NO}+3 \mathrm{NC}$
$D=4 N O+4 N C$
$E=1 N C(E B)$
$\mathrm{H}=1 \mathrm{NO}$ (EM)

Wiring Diagrams

(1) All illuminated devices come with std. Touch-safe shield per UL standards except where noted (Resistor Type Pilot Devices are not touch safe).
(2) For factory installed glass lens, replace the 5th character with "5".
(3) LED color and lens color must match. LED option is not available on units sold "less operating head" Resistor Type Pilot Devices with Standard Incandescent lamps are provided with different value resistors than pilot devices ordered using the LED option. LED lamps can only be installed in pilot lights that are ordered from the factory utilizing the LED option suffix.
(4) For factory installed lens guard, add suffix "V".
(5) Replace asterisk (*) in LED part number with color option that matches lens. See replacement lamps on page 17-271, for complete catalog number.

## Pushbutton Units and Indicator Lights

30 mm Heavy Duty, Watertight/Oiltight, Class 52

Wiring Diagrams

(1) LED option available. For single LED only, append $\mathbf{B}$ to the end of the order number. Single LEDs available for all colors. LED color and lens color must match. LED option is not available on units sold "less operating head" Example: Single LED: 52PT6D3AB (Cluster LED option is not available for PTT Pilot Lights.)
(2) To order a color option, replace the 7th digit of the order number.
(3) Replace asterisk (*) in LED part number with color option that matches lens. See replacement lamps on page 17-271, for complete catalog number.
(4) For factory installed lens guard, add suffix "V".

## Pushbutton Units and Indicator Lights

30 mm Heavy Duty, Watertight/Oiltight, Class 52
Selection and ordering data

|  | Ohms / color | Order no. |
| :--- | :--- | :--- |

[^0]:    (1) LED option available. For single LED, append $\mathbf{X B}$ to the end of the order number. For a cluster LED, append $\mathbf{X Y}$ to the end of the order number. Single LEDs available for all colors, while cluster LEDs are available for red, green and amber only. LED color and lens color must match. LED option is not available on units sold "less operating head". Example: Single LED: 52PL5G3XB Cluster LED: 52PL5G3XY
