SITOP PSU8600/3AC/24VDC/40A/4X10A PN

SITOP PSU8600 3AC 40 A/4x10 A PN stabilized power supply input: 400-500 V 3 AC output: 24 V DC/40 A/4x 10 A with PN/IE connection web server integrated OPC UA server integrated *Ex approval no longer available*

Input	
type of the power supply network	3-phase AC
supply voltage at AC	
 minimum rated value 	400 V
 maximum rated value 	500 V
● initial value	320 V; Derating 320 … 360 and 530 … 575 V
 full-scale value 	575 V
design of input wide range input	Yes
operating condition of the mains buffering	at Vin = 400 V; Prioritized supply Output 1 at power failure can be selected via DIP switch
buffering time for rated value of the output current in the event of power failure minimum	15 ms
operating condition of the mains buffering	at Vin = 400 V; Prioritized supply Output 1 at power failure can be selected via DIP switch
line frequency	
 1 rated value 	50 Hz
 2 rated value 	60 Hz
line frequency	47 63 Hz
input current	
 at rated input voltage 400 V 	2.75 A
 at rated input voltage 500 V 	2.2 A
current limitation of inrush current at 25 °C maximum	14 A
I2t value maximum	2.24 A ² ·s
fuse protection type	none
• in the feeder	Required: 3-pole connected miniature circuit breaker 10 16 A characteristic C or circuit breaker 3RV2011-1DA10 (setting 3 A) or 3RV2711-1DD10 (UL 489)
Output	
voltage curve at output	Controlled, isolated DC voltage
number of outputs	4
output voltage at DC rated value	24 V
output voltage	
 at output 1 at DC rated value 	24 V
 at output 2 at DC rated value 	24 V
 at output 3 at DC rated value 	24 V
at output 4 at DC rated value	24 V
relative overall tolerance of the voltage	3 %
relative control precision of the output voltage	
 on slow fluctuation of input voltage 	0.2 %
 on slow fluctuation of ohm loading 	0.1 %
residual ripple	
• maximum	100 mV
voltage peak	

	000 1/
• maximum	200 mV
adjustable output voltage	4 28 V
product function output voltage adjustable	Yes
type of output voltage setting	via potentiometer or IE/PN interface; Derating > 24 V: 4%/V; max. 240 W per output, max. 960 W overall system
display version for normal operation	3-color LED for operating state device; LED for operating mode manual/remote; 4 LEDs for communication PROFINET; 3-color LED per output for operating state output; LED green for parallel operation Output 1 and 2 / 3 and 4
type of signal at output	Relay contact (changeover contact, contact current capacity DC 60 V/0.3 A) for "Operating state OK"
behavior of the output voltage when switching on	No overshoot of Vout (soft start)
response delay maximum	1 s; Without on-delay of the outputs
type of outputs connection	Simultaneous connecting-in of all outputs after device booting or delay time of 25 ms, 100 ms or "load-optimized" for sequential cutting-in of the outputs via DIP switches can be set
voltage increase time of the output voltage	
• maximum	500 ms
output current	
 rated value 	40 A
 per output 	10 A
 at output 1 rated value 	10 A
 at output 2 rated value 	10 A
 at output 3 rated value 	10 A
 at output 4 rated value 	10 A
 rated range 	0 40 A; +50 +60 °C: Derating 2.5%/K; no derating in connection with expansion module CNX8600 and total load of the outputs at the basic device max. 480 W
supplied active power typical	960 W
product featureparallel switching of outputs	Yes; Parallel circuit Output 1 with 2 or Output 3 with 4 can be selected
bridging of equipment	via DIP switch No
Efficiency	
efficiency in percent	93 %
efficiency in percent power loss [W]	93 %
	93 % 72 W
power loss [W]at rated output voltage for rated value of the output	
 power loss [W] at rated output voltage for rated value of the output current typical 	72 W
 power loss [W] at rated output voltage for rated value of the output current typical during no-load operation maximum Closed-loop control relative control precision of the output voltage with rapid fluctuation of the input voltage by +/- 15% typical 	72 W 20 W 0.1 %
 power loss [W] at rated output voltage for rated value of the output current typical during no-load operation maximum Closed-loop control relative control precision of the output voltage with rapid fluctuation of the input voltage by +/- 15% typical relative control precision of the output voltage load step of resistive load 50/100/50 % typical 	72 W 20 W
 power loss [W] at rated output voltage for rated value of the output current typical during no-load operation maximum Closed-loop control relative control precision of the output voltage with rapid fluctuation of the input voltage by +/- 15% typical relative control precision of the output voltage load step of resistive load 50/100/50 % typical setting time 	72 W 20 W 0.1 % 0.4 %
 power loss [W] at rated output voltage for rated value of the output current typical during no-load operation maximum Closed-loop control relative control precision of the output voltage with rapid fluctuation of the input voltage by +/- 15% typical relative control precision of the output voltage load step of resistive load 50/100/50 % typical setting time emaximum 	72 W 20 W 0.1 %
 power loss [W] at rated output voltage for rated value of the output current typical during no-load operation maximum Closed-loop control relative control precision of the output voltage with rapid fluctuation of the input voltage by +/- 15% typical relative control precision of the output voltage load step of resistive load 50/100/50 % typical setting time 	72 W 20 W 0.1 % 0.4 % 10 ms
 power loss [W] at rated output voltage for rated value of the output current typical during no-load operation maximum Closed-loop control relative control precision of the output voltage with rapid fluctuation of the input voltage by +/- 15% typical relative control precision of the output voltage load step of resistive load 50/100/50 % typical setting time 	72 W 20 W 0.1 % 0.4 % 10 ms max. 35 V (max. 500 ms)
 power loss [W] at rated output voltage for rated value of the output current typical during no-load operation maximum Closed-loop control relative control precision of the output voltage with rapid fluctuation of the input voltage by +/- 15% typical relative control precision of the output voltage load step of resistive load 50/100/50 % typical setting time maximum Protection and monitoring design of the overvoltage protection property of the output short-circuit proof 	72 W 20 W 0.1 % 0.4 % 10 ms max. 35 V (max. 500 ms) Yes
 power loss [W] at rated output voltage for rated value of the output current typical during no-load operation maximum Closed-loop control relative control precision of the output voltage with rapid fluctuation of the input voltage by +/- 15% typical relative control precision of the output voltage load step of resistive load 50/100/50 % typical setting time 	72 W 20 W 0.1 % 0.4 % 10 ms max. 35 V (max. 500 ms) Yes electronic overload cut-off; optionally constant current operation can be selected for Output 4 via DIP switches
 power loss [W] at rated output voltage for rated value of the output current typical during no-load operation maximum Closed-loop control relative control precision of the output voltage with rapid fluctuation of the input voltage by +/- 15% typical relative control precision of the output voltage load step of resistive load 50/100/50 % typical setting time maximum Protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection adjustable current response value current of the current-dependent overload release 	72 W 20 W 0.1 % 0.4 % 10 ms max. 35 V (max. 500 ms) Yes electronic overload cut-off; optionally constant current operation can be selected for Output 4 via DIP switches 0.5 10 A
 power loss [W] at rated output voltage for rated value of the output current typical during no-load operation maximum Closed-loop control relative control precision of the output voltage with rapid fluctuation of the input voltage by +/- 15% typical relative control precision of the output voltage load step of resistive load 50/100/50 % typical setting time maximum Protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection adjustable current response value current of the current- 	72 W 20 W 0.1 % 0.4 % 10 ms max. 35 V (max. 500 ms) Yes electronic overload cut-off; optionally constant current operation can be selected for Output 4 via DIP switches
 power loss [W] at rated output voltage for rated value of the output current typical during no-load operation maximum Closed-loop control relative control precision of the output voltage with rapid fluctuation of the input voltage by +/- 15% typical relative control precision of the output voltage load step of resistive load 50/100/50 % typical setting time maximum Protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection adjustable current response value current of the current-dependent overload release type of response value setting 	72 W 20 W 0.1 % 0.4 % 10 ms max. 35 V (max. 500 ms) Yes electronic overload cut-off; optionally constant current operation can be selected for Output 4 via DIP switches 0.5 10 A
 power loss [W] at rated output voltage for rated value of the output current typical during no-load operation maximum Closed-loop control relative control precision of the output voltage with rapid fluctuation of the input voltage by +/- 15% typical relative control precision of the output voltage load step of resistive load 50/100/50 % typical setting time maximum Protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection adjustable current response value current of the current-dependent overload release type of response value setting switching characteristic 	72 W 20 W 0.1 % 0.4 % 10 ms max. 35 V (max. 500 ms) Yes electronic overload cut-off; optionally constant current operation can be selected for Output 4 via DIP switches 0.5 10 A via potentiometer or IE/PN interface Ia >1.0<1.5 x Ia threshold permissible for 5 s; Ia limit (= 1.5 x Ia
 power loss [W] at rated output voltage for rated value of the output current typical during no-load operation maximum Closed-loop control relative control precision of the output voltage with rapid fluctuation of the input voltage by +/- 15% typical relative control precision of the output voltage load step of resistive load 50/100/50 % typical setting time maximum Protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection adjustable current response value current of the current-dependent overload release type of response value setting switching characteristic of the excess current 	72 W 20 W 0.1 % 0.4 % 10 ms max. 35 V (max. 500 ms) Yes electronic overload cut-off; optionally constant current operation can be selected for Output 4 via DIP switches 0.5 10 A via potentiometer or IE/PN interface Ia >1.0<1.5 x Ia threshold permissible for 5 s; Ia limit (= 1.5 x Ia threshold) permissible for 200 ms Ia limit (= 1.5 x Ia threshold permissible for 5 s, afterwards Ia threshold continuous via sensor per output or IE/PN interface
 power loss [W] at rated output voltage for rated value of the output current typical during no-load operation maximum Closed-loop control relative control precision of the output voltage with rapid fluctuation of the input voltage by +/- 15% typical relative control precision of the output voltage load step of resistive load 50/100/50 % typical setting time maximum Protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection adjustable current response value current of the current-dependent overload release type of response value setting switching characteristic of the excess current of the current limitation design of the reset device/resetting mechanism remote reset function 	72 W 20 W 0.1 % 0.4 % 10 ms max. 35 V (max. 500 ms) Yes electronic overload cut-off; optionally constant current operation can be selected for Output 4 via DIP switches 0.5 10 A via potentiometer or IE/PN interface Ia >1.0<1.5 x la threshold permissible for 5 s; la limit (= 1.5 x la threshold) permissible for 200 ms la limit (= 1.5 x la threshold permissible for 5 s, afterwards la threshold continuous via sensor per output or IE/PN interface Non-electrically isolated 24 V input (signal level "high" at > 15 V)
 power loss [W] at rated output voltage for rated value of the output current typical during no-load operation maximum Closed-loop control relative control precision of the output voltage with rapid fluctuation of the input voltage by +/- 15% typical relative control precision of the output voltage load step of resistive load 50/100/50 % typical setting time maximum Protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection adjustable current response value current of the current-dependent overload release type of response value setting switching characteristic of the excess current of the current limitation 	72 W 20 W 0.1 % 0.4 % 10 ms max. 35 V (max. 500 ms) Yes electronic overload cut-off; optionally constant current operation can be selected for Output 4 via DIP switches 0.5 10 A via potentiometer or IE/PN interface Ia >1.0<1.5 x Ia threshold permissible for 5 s; Ia limit (= 1.5 x Ia threshold) permissible for 200 ms Ia limit (= 1.5 x Ia threshold permissible for 5 s, afterwards Ia threshold continuous via sensor per output or IE/PN interface
 power loss [W] at rated output voltage for rated value of the output current typical during no-load operation maximum Closed-loop control relative control precision of the output voltage with rapid fluctuation of the input voltage by +/- 15% typical relative control precision of the output voltage load step of resistive load 50/100/50 % typical setting time maximum Protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection adjustable current response value current of the current-dependent overload release type of response value setting switching characteristic of the excess current of the current limitation design of the reset device/resetting mechanism remote reset function overcurrent overload capability in normal operation 	72 W 20 W 0.1% 0.1% 0.4% 10 ms max. 35 V (max. 500 ms) Yes electronic overload cut-off; optionally constant current operation can be selected for Output 4 via DIP switches $0.5 10 A$ via potentiometer or IE/PN interface Ia >1.0<1.5 x la threshold permissible for 5 s; la limit (= 1.5 x la threshold) permissible for 200 ms
 power loss [W] at rated output voltage for rated value of the output current typical during no-load operation maximum Closed-loop control relative control precision of the output voltage with rapid fluctuation of the input voltage by +/- 15% typical relative control precision of the output voltage load step of resistive load 50/100/50 % typical setting time maximum Protection and monitoring design of the overvoltage protection property of the output short-circuit proof design of short-circuit protection adjustable current response value current of the current-dependent overload release type of response value setting switching characteristic of the excess current of the current limitation 	72 W 20 W 0.1% 0.1% 0.4% 10 ms max. 35 V (max. 500 ms) Yes electronic overload cut-off; optionally constant current operation can be selected for Output 4 via DIP switches $0.5 10 A$ via potentiometer or IE/PN interface Ia >1.0<1.5 x la threshold permissible for 5 s; la limit (= 1.5 x la threshold) permissible for 200 ms

PROFINET protocol	Yes
protocol is supported OPC UA	Yes
Safety	
galvanic isolation between input and output	Yes
galvanic isolation	Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178
operating resource protection class	Class I
leakage current	
• maximum	3.5 mA
protection class IP	IP20
Approvals	
certificate of suitability	
• CE marking	Yes
UL approval	Yes; cULus-Listed (UL 508, CSA C22.2 No. 107.1), File E197259; cCSAus (CSA C22.2 No. 60950-1, UL 60950-1)
CSA approval	Yes; cULus-Listed (UL 508, CSA C22.2 No. 107.1), File E197259; cCSAus (CSA C22.2 No. 60950-1, UL 60950-1)
 cCSAus, Class 1, Division 2 	No
• ATEX	No
certificate of suitability	
• IECEx	No
NEC Class 2	No
ULhazloc approval	No
FM registration	No
type of certification CB-certificate	Yes
certificate of suitability	
 EAC approval 	Yes
• C-Tick	No
certificate of suitability shipbuilding approval	Yes
shipbuilding approval	ABS, DNV GL
Marine classification association	Y
American Bureau of Shipping Europe Ltd. (ABS)	Yes
French marine classification society (BV) DNV CL	No
DNV GL Lloude Degister of Shipping (LDS)	Yes
 Lloyds Register of Shipping (LRS) Nippon Kaiji Kyokai (NK) 	No No
EMC	
standard for emitted interference 	EN 55022 Class B
for mains harmonics limitation	EN 61000-3-2
for interference immunity	EN 61000-5-2
environmental conditions	
ambient temperatureduring operation	-25 +60 °C; with natural convection
during operation during transport	-25 +60 °C; with natural convection
during transport orage	-40 +85 °C
environmental category according to IEC 60721	Climate class 3K3, 5 95% no condensation
Mechanics	
type of electrical connection	Plug-in terminals with screwed connection
• at input	L1, L2, L3, PE: Plug-in terminal with 1 screwed connection each for 0.2 4 mm ² single-wire / fine stranded
• at output	1, 2, 3, 4: Two plug-in terminals (1, 2 and 3, 4) with 2 screwed connections each for 0.2 2.5 mm ² ; 0 V: Plug-in terminal with 3 screwed connections for 0.2 10 mm ²
 for auxiliary contacts 	RST (Reset): Plug-in terminal (together with alarm signal) with 1 screwed connection for 0.2 1.5 mm ²
 for signaling contact 	11, 12, 14 (alarm signal): Plug-in terminal (together with Reset) with 1 screwed connection each for 0.2 1.5 mm ²
product function	
 removable terminal at input 	Yes
 removable terminal at output 	Yes
design of the interface for communication	PROFINET/Ethernet: two RJ45 sockets (2-port switch)
suitability for interaction modular system	Yes
width of the enclosure	125 mm
height of the enclosure	125 mm

depth of the enclosure	150 mm
required spacing	
• top	50 mm
bottom	50 mm
• left	0 mm
• right	0 mm
net weight	2.6 kg
product feature of the enclosure housing can be lined up	Yes
fastening method	Snaps onto DIN rail EN 60715 35x15
electrical accessories	Expansion modules CNX8600, buffer modules BUF8600, module UPS8600
mechanical accessories	Device identification label 20 mm × 7 mm, TI-grey 3RT2900-1SB20
MTBF at 40 °C	207 612 h
other information	Specifications at rated input voltage and ambient temperature +25 °C (unless otherwise specified)
