

## Proximity Sensor with a Long Screw Length

- Increased tightening strength. Cable protectors provided as a standard feature.
- Increased indicator visibility. A milled section for wrench grip on all models.

Be sure to read *Safety Precautions* on page 9.

\*1. Use the E2E2 within the range in which the setting indicator (green LED) is ON (except D2 Models).

\*2. The response frequency is an average value. Measurement conditions are as follows: standard sensing object, a distance of twice the standard sensing object, and a set distance of half the sensing distance.

\*1. The response frequency is an average value. Measurement conditions are as follows: standard sensing object, a distance of twice the standard sensing object, and a set distance of half the sensing distance.

\*2. A full-wave rectification power supply of 24 VDC ±20% (average value) can be used.

\*1. When supplying 24 VAC to any of the above models, make sure that the operating ambient temperature range is at least –25°C to 85°C.

\*2. When using an M18 or M30 Connector Model at an ambient temperature between 70 and 85°C, make sure that the Sensor has a control output (load current) of 5 to 200 mA max.

## Safety Precautions

**⚠ WARNING**

This product is not designed or rated for ensuring safety of persons either directly or indirectly.

Do not use it for such purposes.

**Precautions for Correct Use**

Do not use this product under ambient conditions that exceed the ratings.

## ● Design

**Influence of Surrounding Metal**

When mounting the Sensor within a metal panel, ensure that the clearances given in the following table are maintained.

(Unit: mm)

| Model                                                          |            | Item | M12 | M18 | M30 |
|----------------------------------------------------------------|------------|------|-----|-----|-----|
| DC 2-Wire Models<br>E2E2-X□D□                                  | Shielded   | l    | 0   | 0   | 0   |
|                                                                |            | d    | 12  | 18  | 30  |

### Mutual Interference

When installing Sensors face-to-face or side-by-side, ensure that the minimum distances given in the following table are maintained.

### Mutual Interference

(Unit: mm)

| Model                                                          |            | Item | M12         | M18          | M30          |
|----------------------------------------------------------------|------------|------|-------------|--------------|--------------|
| DC 2-Wire Models<br>E2E2-X□D□                                  | Shielded   | A    | 30<br>(20)  | 50<br>(30)   | 100<br>(50)  |

|                                                                |            | B    | 100<br>(50) | 110<br>(60)  | 200<br>(100) |
| DC 3-Wire Models<br>E2E2-X□C□<br>AC 2-Wire Models<br>E2E2-X□Y□ | Shielded   | A    | 30          | 50           | 100          |
|                                                                |            | B    | 20          | 35           | 70           |
|                                                                | Unshielded | A    | 120         | 200          | 300          |
|                                                                |            | B    | 100         | 110          | 200          |

Note: Values in parentheses apply to Sensors operating at different frequencies.

### ● Mounting

### tening Torque

Do not tighten the nut with excessive force.

A washer must be used with the nut.

The following strengths assume washers are being used.

| Model | Torque  |
|-------|---------|
| M12   | 30 N·m  |
| M18   | 70 N·m  |
| M30   | 180 N·m |

### Relationship between Sizes and Models

| Size | Model                                                   |
|------|---------------------------------------------------------|
