

#### 4-Joint Plug/Socket Connector

Used for reduced wiring for connecting F3W-MA with F3SG-RA.

| Appearance                                                                          | Type                                                               | Specifications                                                                                                                                                                                                                            | Model             |
|-------------------------------------------------------------------------------------|--------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------|
|    | For emitter M12 connectors. Used for reduced wiring.               |                                                                                                                                                         | <b>F39-GCN4-L</b> |
|    | For receiver (PNP output) M12 connectors. Used for reduced wiring. |                                                                                                                                                         | <b>F39-GCN4-D</b> |
|   | Includes one each of F39-GCN4-L and F39-GCN4-D                     | —                                                                                                                                                                                                                                         | <b>F39-GCN4</b>   |
|  | Water-resistive Cover for 4-Joint Plug/Socket Connector            | One water-resistive cover for an F39-GCN4-L/-D 4-Joint Plug/Socket Connector. You can use this when the MA2 connector part is not used.<br><br>Material: PBT. IP67 rated when attached. Smartclick mechanism.                             | <b>XS5Z-11</b>    |
|  | Dust Cover for 4-Joint Plug/Socket Connector                       | One dust cover for an F39-GCN4-L/-D 4-Joint Plug/Socket Connector. You can use this when the MA2 connector part is not used.<br><br>Material: Rubber/black. This cover does not ensure IP67 degree of protection.                         | <b>XS2Z-14</b>    |
|  |                                                                    | XS2Z-14: Attach to a pin block inside the M12 female screw.<br>XS2Z-15: Attach to a M12 female screw. When attaching the cover to the connector, press the cover onto the connector until the connector is fully inserted into the cover. | <b>XS2Z-15</b>    |
