600cd/m² (8.4"), 700cd/m² (10.4")
- Supports Expansion I/O Module
- Ethernet, Serial, USB Ports

NEW High Definition Quality OI Touchscreens with SVGA Resolution and over 65K Color

IDEC introduces the next generation in OI Touchscreens, the 8.4- and 10.4-inch TFT color HG3G Series. These high-performance OITs offer a vivid screen and fast CPU processor of 400MHz for quick operation and response time. The high-definition quality LCD screens, with SVGA 800 x 600 pixels, provide sharp images and superior visibility. Plus 65,536 colors make screen views realistic and crisp, making it easy to see precise readings of graphs or data instantly. At up to 700cd/m², these are also the brightest displays in the market today, creating a powerful visual presentation.

OI Touchscreens

	Operator Interface	Power Supply	Software and Cables	Part Number		
	8.4" Color TFT, Black Bezel	60W	Yes	SMARTTOUCH-3G-8
