Handle and spare fuse storage clip for OSM

Handle and two spare fuses (for motor operator) can be stored on the OTVS_. OTVS_ can be installed on the left side of the motorized switch-fuse OSM_. Snap-on mounting, no tools required.

On OSM1250, the size of the handle prevents the installation onto the switch frame. However, the handle clip can be separately installed on the panel frame and the fuse holder clip onto the switch frame.
