NEW

Features

Easier and More Convenient to Use

Simple Setting

Independent Day Keys make setting easy.

Up/down set value changing for speedy setting.

Temporary holidays (non-operating days) are also easy to set.

Weekly models: Specify the day.
Yearly models: Specify the date.

Convenient Functions

Time Counter/Total Counter Functions (See note.)

This function makes it possible to monitor the total time that a load has been applied, or the total number of operating cycles. It allows the Time Switch to be used for managing maintenance.

Time Adjustment Function (See note.)

The time can be set to 00 min 00 s by using an external input. The times on multiple Time Switches can also be easily synchronized.

Note: Equipped on 2-circuit models.

More Applications on New Series Models

Yearly Models **NEW**

Automatic Program Switching by Seasons

The yearly operation can be set to automatically change the weekly program depending on the season. (See note.)

Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	Jan	Feb
Spring			Summer			Autumn			Winter		
Season (See note 2.)		Spring		Summer		Autumn		Winter			
Program example		17:30 ON ▼ 21:00 OFF		19:00 ON ▼ 22:00 OFF		18:00 ON ▼ 21:00 OFF		17:00 ON ▼ 21:00 OFF			

Note: Up to four seasons can be set for 4-circuit models, and up to two seasons for 2-circuit models.

Temperature Compensation Circuit Maintains Accurate Time

A temperature compensation circuit is provided in the yearly models to maintain accurate time keeping even when the ambient temperature varies greatly. This ensures precise operation with minimal time lags all year round, regardless of temperature changes.

4-circuit Models **NEW**

Space-saving, Economical 4-circuit Models Added to the Series
