Note: 1. When the setting has been changed, turned power off and on to continue. The display will show "0" when the power is turned back on.

2. The decimal point will flash every second when "99999.9 h" is set.

■ Operating Modes

Total Counters

Note: The count value will return to "0" when "999999" is exceeded.
The display and output are turned OFF when the power supply turns OFF, but the count value is stored internally.

Time Counters

Note: Display values are shown for full scale set to 99999.9 h.
The count value will return to "0" when "99999.9" is exceeded.
The display and output are turned OFF when the power supply turns OFF, but the count value is stored internally.

Nomenclature

Panel Cutouts

Panel cutouts are as shown below (according to DIN43700).

Note: 1. The mounting panel thickness should be 1 to 6 mm.

2. Water resistance will be lost if Counters are mounted side-by-side.

3. The terminal screws are M3.5. (The effective thread length is 6 mm.)

4. When horizontally mounting Counters side-by-side, leave at least 50 mm between any two Counters.

With Flush Mounting Bracket

ALL DIMENSIONS SHOWN ARE IN MILLIMETERS.

To convert millimeters into inches, multiply by 0.03937. To convert grams into ounces, multiply by 0.03527.
